BGHL is a closed-ended investment company which invests in BG Fund, Boussard & Gavaudan's flagship fund with 20 years of track record.

BGHL's investment objective is to deliver an annual return, net of fees, of 400 to 600 basis points above the risk-free rate over the business cycle, irrespective of market performance. The risk-free rate is "Compounded euro short-term rate index" ⁽¹⁾.

BG Fund is driven by bottom-up fundamental and event catalyst research, combined with extensive multi-asset arbitrage and derivative expertise. Typically, investment ideas are catalyst driven with a focus on special situations and events.

Capital is dynamically allocated to the firm's best ideas and these ideas are categorized into four main types of strategies: Equity, Volatility, Credit and Trading strategies.

⁽¹⁾ The risk-free rate is the combination of the Eonia Capitalization index 7 day (EONCAPL7 Index) from 11/2006 to 09/2019 and the Compounded Euro short-term rate index (ESTR OIS Index) from 10/2019 onwards.

II. OVERVIEW

Boussard & Gavaudan Holding Limited ("BGHL") is a Guernsey closed-ended investment company and is registered with the Dutch Authority for the Financial Markets as a collective investment scheme under article 1:107 of the Dutch Financial Markets Supervision Act. BGHL invests its assets in order to provide exposure to multiple alternative investment strategies managed by the Investment Manager. The investment objective is to produce long-term appreciation of its assets. BGHL seeks to achieve this by investing in BG Fund ("the Fund"). In addition, a proportion of the net assets of BGHL may, at the discretion of the Investment Manager, be invested in other hedge funds and financial assets selected by the Investment Manager. BGHL aims to generate a target NAV annualized return of Eonia capitalized + 400/600 bps over the business cycle, net of all fees.

A. <u>BG FUND</u>

February 2024 HIGHLIGHTS

Equity markets continued their strong rally in February with the EuroStoxx 50[®] Total Return and the S&P500[®] Total Return up +5.04% and +5.34% respectively.

Volatility continued to decline and the market implied volatility measure VStoxx[®] decreased slightly, finishing the month at 13.8% while the iTraxx Crossover[®] (S39) continued to tighten from 328bps to 305bps in line with the risk-on tone.

BG Fund was down -31bps (USD A shares) for the month. In terms of attribution, strong performance was seen in convertibles and trading which was offset by short term price stress in several special situations in equity and credit strategies.

February 2024 COMMENTARY

Volatility strategies

Mandatory convertible bond arbitrage

Mandatory convertible bonds contributed +2bps this month. Performance was related to a modest general repricing.

Convertible bond arbitrage

Convertible bond strategies contributed +28bps in February.

The earnings season in Europe created volatility and focussed investors on issuer creditworthiness. In this context, a significant proportion of this month's positive contribution came from our positioning on volatility trades while carefully selected credit positions also had a positive performance. The key frustration was that European primary issuance continued to remain at low levels and we hope this is just a temporary delay due to the earnings season.

In the first three weeks of February, the US market felt somewhat weighed down as the 5-year interest rate rose steadily by 40bps from 3.85% to 4.25%. The environment shifted when we started to see new issues come to market, headlined by a \$1.75bn issue from Global Payments, and a \$1.5bn issue from Super Micro Computer, both new names to the convertible bond universe. New issue activity remains healthy as we head into March and it is great so see the anticipated pipeline start to arrive in earnest. New issue pricing is attractive however, we are positioning cautiously as the total amount of primary could lead to cheapening in secondary markets.

Volatility Trading

Volatility trading contributed +1bp to the performance of the fund in February.

Realised volatility vs implied forwards at the end of January * :

	30d Implied vol level on 31/01/24	Realised vol over the month	Difference
US (VIX®)	14.35	12.36	-1.99
EUROPE (Vstoxx [®])	14.82	9.07	-5.75

Variation of implied volatilities during February *:

	Mar. Vol Index Fut as of 31/01/24	Mar. Vol Index Fut as of 29/02/24	Vol move
US (VIX®)	15.67	14.00	-1.67
EUROPE (Vstoxx [®])	15.50	14.25	-1.25

The market continued its bullish tone in February, fuelled by enthusiasm for technology and AI stocks, which influenced sentiment across all sectors. The disciplined and correlated upward trajectory limited general opportunities in volatility trading. Both realised and implied volatility stayed subdued, requiring a cautious, strategic trading approach. We made modest portfolio adjustments, incrementally increasing positions and engaging in marginal trades. We remain vigilant, staying alert to market shifts and ready to take advantage of opportunities as they arise.

Warrant arbitrage

Warrant arbitrage delivered +1bp in February.

Equity strategies

February was a challenging month for the equity portfolio, which finished down -85bps.

The portfolio overall has been held back by a low level of corporate activity in Europe. A number of expected and rumoured deals have so far failed to materialise, or are taking longer than expected to play out, leading to underperformance of our special situations book. This said, the interest rate and financing environment has become more stable. Several small deals have been announced and we are expecting an increase in the size and volume of deals to come through imminently.

The portfolio specifically suffered from a frustrating earnings season. Notably several positions were impacted from the short leg of their hedge. On one specific event position, where our thesis remains intact, the short rallied by more than 20% following a surprise positive earnings release.

Credit strategies

Credit long / short

The credit books contributed +8bps this month.

Credit special situations

Credit special situations was down this month (-43bps). Atos bonds were impacted by uncertainty over potential restructuring scenarios for the company. We remain very constructive on the outlook for this position.

Trading

Trading contributed +58bps in February with positive performance from thematic discretionary trading and systematic trend following.

On systematic trend following, February's strong performance was broad based with all the compartments, except currencies, contributing materially and roughly equally.

B. DIRECT INVESTMENTS OTHER THAN BG FUND

On top of its investment in BG Fund, BGHL has other investments. As of 29 February 2024, the net asset value of these investments represents less than 1.00% of the net asset value of BGHL.

Rasa Malta, S.A.P.I. de C.V. ("Rasa")

Rasa is a holding company structured as a private equity fund in terms of fees and organisation and managed by BK Partners. BGHL holds Rasa shares through Campastros, S.L.U., a wholly-owned holding company in Spain. Rasa is dedicated to investing in land, hotels and high-end resort developments in Mexico. Rasa's main asset is a majority interest in ACTUR, a private company owning the land developing assets. ACTUR's other shareholders are Mexican public institutions.

In July 2020, Rasa made a cash tender offer to buy back its own shares, for a price per share of US\$0.12270. The valuation of BGHL's investment in Rasa shares was marked down on 31 August 2020, using the US\$0.12270 per share price as the estimated fair value of the Rasa shares. This price represents a circa 80% discount to the latest published NAV per share.

Hedge Funds Liquidation Stress Tests

Stress tests' scenarios have been improved in order to take into account liquidity issues. This scenario aims at reflecting, to some extent, how the fund would react in a distressed market environment (as was the case in late 2008). These stress tests combine the three following adjustments:

• Small, Mid and Large caps adjustment

In certain market conditions, beta may become much higher than its level in normal market conditions and thus the hedging of such positions may not be effective. To address this kind of circumstance we apply a corrective factor to the beta of small, mid and large caps respectively. Since April 2019, the corrective factors have been calibrated on the amplitude of the stresses by looking at worst historical scenario since 1987.

	-5%	-10%	-20%	-30%
Small (<1bn)	2.00	1.75	1.50	1.30
Mid (1bn-5bn)	1.50	1.50	1.25	1.20
Large (5bn-20bn)	1.20	1.15	1.10	1.05
Mega (>20bn)	1.00	1.00	1.00	1.00

Risk arbitrage adjustment

The risk of risk arbitrage positions is taken into account differently in case the market drops by more than 10%. We consider that one third of risk arbitrage positions will collapse.

• Liquidity adjustment

An average discount (realized in 2008) is applied to bond, convertible bond (including mandatory convertible bond) and loan prices in case credit spreads widen by more than 25%.

Mandatories:Adj. price = Max(Shifted Price - 5% * Max(Credit spread shift - 25%, 0), Parity)Others :Adj. price = Max(Shifted Price - 5% * Max(Credit spread shift - 25%, 0), 0)

• The current risk profile of the AIF and a description of the risk management systems employed by BGIM to manage market risk, liquidity risk, counterparty risk and other risks, including operational risk:

Please refer to this newsletter for the current risk profile of the Fund.

The backbone of the portfolio and risk management systems at BGIM relies on several components all interfaced together to ensure a full Straight Through Processing. The main system is FusionInvest provided by Misys used for position keeping and risk management. FusionInvest is interfaced to a real time market data vendor for real time P&L and risk calculation. Another key system is Trade Smart, the Execution Management System provided by Trading Screen that is interfaced to an in-house implemented Order Management System, itself connected in real time to FusionInvest. All figures used for qualitative and quantitative risk management are produced out of FusionInvest.

• The gross investment exposure of the Company at any time may represent a maximum of 2 times the Net Asset Value at the time of investment.
